

## How To Use iConn's OneClickDigital Audiobook & eBook Service

- First, go to <http://iconnct.oneclickdigital.com/Home/Featured.aspx>, which brings you to iConn's OneClickDigital Audiobook Homepage.
- Now, create an account with iConn's OneClickDigital by clicking on the 'Create New Account' link in the top right hand corner of the page (Note: When creating your account, don't worry about the eAudio / eBook preferences, they don't seem to make a difference no matter what you select).
- Once you successfully create an account, you will be brought back to the OneClickDigital homepage, and you should see your name in the top right hand corner. You are now ready to check out an audiobook!
- Now, before you check an item out you have to figure out what device you are going to listen to your audiobooks on. If you are going to listen on a PC or MAC computer, you will need to download the OneClickDigital Media Manager for either Windows or MAC. If you are going to listen to your audiobook on a mobile device, such as an Android tablet / phone, or an Apple tablet / phone, you will need to navigate to your respective app store on your device and download the OneClickDigital App. To download the OneClickDigital Media Manager for PC or MAC, please visit the following link (<http://iconnct.oneclickdigital.com/Help/Help.aspx>) and ensure that you download the correct version (either Windows or MAC).
- Now you will want to check out an audiobook or eBook. On the OneClickDigital Homepage (see above), you can either perform a search for a specific title / author / narrator / audience using the 'Quick Search' option, or, you can browse through a specific genre of items (or everything at once) using the 'Browse' option. Note: Once you perform a search or browse, you can limit your search list to show only those items that you can check out immediately (i.e. no reserves) by clicking on the 'Available' link on the right of your screen.
- Once you find the title you want, click on its cover in the search results list. Now, to check out your item, proceed to the bottom right hand corner of your screen and select 'Check out' (you can select what number of days you want the item – the maximum is 14 days). A download link should pop up at this point, which you will disregard and hit cancel. Note: To see what items you have downloaded and more information about your OneClickDigital account, click on the 'My Collections' link at the top of the page.
- Now you will want to download your checked out item to your OneClickDigital app or Media Manager, depending on which you selected above. In either case, the first time you load each program you will be asked to sign in using the log in information you created when you signed up for a new account above. Once you successfully log-in, you should be immediately brought to a screen which shows the items you have checked out. Simply click the 'Download' button, and your item will begin to load and play. Enjoy!
